

# \*\*\* \$99.00 SERVER COLLOCATION \*\*\*

As companies grow and become more active and successful on the Internet, they need more bandwidth, power, security, and control to manage the business traffic. One solution for a business is to purchase expensive servers and telecommunication equipment and to build a data center. But on-site centers require costly overhead and are underutilized.

As a Collocation customer, you manage your own dedicated, password-protected server while gaining the benefits of having it installed in our state-of-the-art facility.

**CyberLynk offers a lower cost alternative. It's called "server collocation."**

## With Collocation, you can:

- ✓ Offer first-class Web service to your customers, employee's and vendors.
- ✓ Improve access speeds from the U.S.
- ✓ Improve access speeds from much of the rest of the world.
- ✓ Improve your customer's ability to engage in global ecommerce.
- ✓ Reduce the need for international upstream bandwidth between your network and the Internet.

## CyberLynk's Basic Collocation Includes:

- Dedicated 100Mbs Switch Ports
- Redundant Cisco 7000 Series Routers
- Business Class Service
- 1 Static IP Address
- 24/7 Link Monitoring
